pallets, containers, tools, vehicles, ...

Benefits

- All-in-1 partner : Hardware, Software & Connectivity
- Full support during PoC, deployment, maintenance and data analysis
- Designed and made in France
- Open and scalable cloud
- Automated inventories
- Customized alerts
- Costs and time reduction
- Process optimization

With inVirtus innovative asset tracking system, we are now finally able to track real-time our hundreds of production trolleys, wherever they are located, in the workshop and on the docks. The system is especially affordable, easy to install and customize, and reliable. We hope to save a huge time on locating and managing these assets, and to dramatically improve our processes.
